#### Competition description

MTBO stage race for individual competitors. Last stage organised as semi free order with chasing start starting intervals equal to the overall standings. **The ranking for chasing start is set according to the points from 3 best scoring out of 4 stages!**

The number of points for each stage is calculated by common pattern, where 100 points equals the average time of first three class winners. The calculation of time start for the last E5 stage will correlate, that is to say the leader = start 00 and the following start intervals will be calculated from the point's handicap and the target time for each class (expected time of the winner). Stage E0 Prologue - model event race is not included into the overall standing.

Information system of ČSOS - [ORIS](#).
