Check carefully that you are punching the control within the correct time range, if you accidentally punch the control before it is opened, you must repeat the punch after the unit is open (within the time range).

Punch system: SPORTident, card readout at the event center, SI units will be in contact mode; in case of a non-functioning SI unit at the control, the competitor punches mechanically anywhere on the map.

Regulations: the race is run according to the current SMIK rules: <http://safka.eu/smik/prav.htm>

Principle: Controls will be drawn on the race map in three different colors (see header image):

purple - 1 point

blue - 2 points

green - 3 points

Each of the controls has 3 positions in which it is located during the race, the positions are marked A, B, C. The competitor will only get point(s) for the control if he/she punches it in the correct position at the correct time. The time windows when the control is active in which position are marked in the timetable.

Punching a control outside its active time or in a different position is not scored. A competitor can get points only once for each control, so if he has already punched control 32A at the correct time, he will not get another point if he checks control 32C at the correct time.

A competitor will be penalized for finishing after the time limit of 45 minutes according to the following sequence:

45:01 - 45:59: 1 penalty point

time 46:00 - 46:59: 1+2 penalty points

time 47:00 - 47:59: 1+2+3 penalty points

Time 48:00 - 48:59: 1+2+3+4 penalty points

...

For SMIK beginners, we recommend studying the map and timetable of controls from the last SMIK World Championship in 2021: <http://www.safka.eu/smik/akt.htm>
